**N°02/24**

Publication date :  
26 SEP 2024

**SUBJECT : New allocation of code IFF/SIF mode 3/A codes 5001 to 5077.**

CMCC AIX is now equipped with 4-Flight control system which doesn't allow to use simultaneously the same code IFF/SIF at two different locations. This generates a « DUPE » alarm that the operator has to solve. Besides, a previously used code cannot be reused until it is allowed by the system. Therefore, CMCC AIX is facing a code SIF/IFF shortage.

To tackle it, CMCC AIX will use codes 5011 to 5027 in addition to its present 5001 to 5007. This will also imply a new allocation of codes IFF/SIF for CDC MARSAN, CDC LYON and CDC CINQ MARS in the serie 5001 to 5077.

**1. Control centres impacted by this new codes mode 3/A allocation :**

CMCC AIX, CDC LYON, CDC CINQ MARS and CDC MARSAN.

**2. Date of implementation and validity:**

From Monday 07th October to MILAIP ENR 1.6 publication.
